

A New Jersey DOT Super-Slab® Pavement Repair Project

NJ Route 42 Pavement Repair Contract #DP 08428 Camden & Gloucester Cty., NJ

Project Particulars

Owner: The New Jersey Department of Transportation
Traffic Count: 107,000 ADT
Work Window: 6 Hours (for two lanes) at night only
Type of Contract: Design, Bid, Build
Specification: Fort Miller Fabrication and Installation Standards
Type of Repair: Intermittent and continuous

The project included restoration of 9.62 miles of this 6-lane state highway that is a major commuter thoroughfare in and out of Philadelphia from southern New Jersey. Normal weight precast concrete Super-Slab® panels were used for full-depth replacement on the roadway. Work zone closures were generally limited to six night-time hours during which two of three lanes could be closed for work. Despite the short work windows, the contractor regularly installed 10 slabs per night in intermittent repair areas.

Slab Details

Slab Dimensions: 12' Wide x 10' Long (Avg.) X 8.75" thick
Slab Area: 73,280 SF (8142 SY)
No. Slabs: 703
Surface Type: All slabs were single plane.

Slab Installation

Installation Dates: Summer / Fall, 2009
Months of Installation: 5- 1/2
Production Rate: 8 -10 slabs per night (avg.)
